

## Course:

IDMSS Advanced Airway/TMD Workshop

## Course Description:

The advanced TMD/Airway Workshop will take the principles and lessons learned in the Essentials online courses and focus on the clinical application needed to successfully implement a practice model.

NOTE: Ideally, each participant will complete the IDM Foundations Seminar, the IDM Essentials of Airway Course, and the IDM Essentials of TMD course prior to enrolling in this Workshop.

## Learning Objectives:

Attendees will:

1. Practice the utilization of high resolution pulse oximetry (HRPO) and home sleep testing (HST) in clinical practice
2. Practice the use of oral appliances for the treatment of airway problems
3. Interpret CBCT scans to evaluate airway problems
4. Use the Piper Classification of TMJ disorders
5. Practice interpreting MRIs in diagnosing TM Joint problems
6. Utilize various occlusal splints for the treatment of TMD
